Carton Quantity:	100
Carton Dimensions:	N/A
Weight:	N/A
Disc Surface:	N/A
Units/Pallet:	N/A

Super Eutectic Recording Layer (SERL) is behind the success of Verbatim's CD-RW disc. This high technology material ensures smooth switching between record/erase phases along with high thermal stability in the recording layer. This stability in the recording layer translates into high reliability, low signal noise and long-term archive stability.
